In Trust With The Gospel

Elder Keith Ellis

Where in Heaven is The Earth

Here is what Edwin Hubble had to say about the earth being in a favored position, ie, in the center of universe.

"But the unwelcome supposition of a favoured location must be avoided at all costs....Such a favoured position, of course, is intolerable ... Therefore, in order to restore homogeneity, and to escape the horror of a unique position, the departures from uniformity, which are introduced by the recession factors, must be compensated by the second term representing effects of spatial curvature. There seems to be no other escape."

It is unwelcome, to be avoided as an intolerable horror Mr Hubble? Why?

It would demolish your delusion that God does not exist, that's why.

Statements such as his show their blatant disregard for truth. For them, God must be disproved at all cost. Even if they have to lie and fake their science.

Many other astronomers are on record making similar statements.
